TARGET MARKETS

Singapore • Remote

"Where mathematical precision of software converges with the sensory intuition of human-centered design."

Dual-discipline **Software Developer and UI/UX Specialist** with **4 years of enterprise track record** architecting digital passenger ecosystems for world-class aviation leaders including **Singapore Airlines (SIA)** and **Scoot Pte. Ltd.** Seamlessly translates intricate booking architectures into fluid, accessible design systems codified directly into modular production front-ends. Eliminates friction between design vision and technical execution.

02 // ACADEMIC & LINGUA CREDENTIALS

BACHELOR OF INFORMATION TECHNOLOGY

Focus: Software Engineering & Human-Computer Interaction (HCI)

Deep exploration of interface ergonomics, scalable frontend component architecture, responsive graphics, and algorithmic computation.

LANGUAGE MASTERY &
PHILOSOPHY

English: Professional Working Proficiency

Vietnamese: Native Fluency

Atelier Ethos: Pixel-perfect craft, code readability, continuous critique, and empathetic user advocacy.

03 // PROFESSIONAL PRACTICE TIMELINE

Demonstrated Impact in Global Aviation

Software Developer & UI/UX Designer

2023 - PRESENT

Singapore Airlines (SIA) – Aviation & Digital Customer Platforms (Singapore)

- Partnered across distributed global squads to design and develop passenger-facing digital booking funnels, seat selection maps, and self-service mobile interfaces.
- Established and curated a centralized Figma design system with strict token taxonomy, translating design variables directly into modular front-end code to **reduce design-to-development handoff by 30%**.
- Conducted user testing sessions with high-frequency international travelers, iteratively refining wireframes to eliminate cognitive friction and enhance ancillary checkout conversion.
- Integrated front-end views with high-throughput enterprise REST APIs, maintaining strict **WCAG 2.1 AA accessibility** and sub-second paint benchmarks.

UI/UX & Mobile Developer

2022 - 2023

Scoot Pte. Ltd. (Singapore Airlines Group) – Singapore / Remote

- Engineered intuitive mobile experiences and modular components for Scoot's traveler app across iOS and Android platforms.
- Owned the **Apple TestFlight deployment and testing cycles**, monitoring crash telemetry, triaging edge-case UI regressions, and resolving over 120+ mobile accessibility and rendering tickets.
- Redesigned digital boarding pass screens, flight status monitors, and ancillary add-on sheets in strict alignment with aviation regulatory standards and dynamic brand systems.

04 // FEATURED ENTERPRISE DELIVERABLES

Tangible Artifacts Shipped

EXHIBIT // SIA-01

ENTERPRISE WEB

SIA Digital Booking & Ancillary Flow

Led UX redesign and component code for seat selection upgrades, optimizing responsive viewport ergonomics and creating a frictionless 3-step checkout experience for passengers.

Figma • React • TypeScript • Design Tokens • REST APIs

EXHIBIT // SCOOT-02

MOBILE APP

Scoot Traveler Companion & TestFlight

Streamlined TestFlight distribution cadence, revamped flight tracking cards, and optimized offline local storage for intermittent in-flight connectivity.

iOS / Android • TestFlight • Figma • JSON • Mobile UX

05 // INDUSTRY ACTIVITIES & PROFESSIONAL DISCOURSE

VIETNAM WEB SUMMIT

Delegate and active community member, focusing on AI-augmented UX research workflows, design token automation, and next-generation web architectures.

AGILE SOFTWARE CRAFTSMANSHIP

Specialized workshops in Agile/Scrum ceremonies, user story mapping, cross-functional engineering alignment, and rapid sprint delivery pipelines.
